THE ANNALS *of* STATISTICS

An Official Journal of the
Institute of Mathematical Statistics

Articles

Functional linear regression with points of impact
Alois Kneip, Dominik Poss and Pascal Sarda 1
Asymptotics in directed exponential random graph models with an increasing bi-degree sequence . . . . . Ting Yan, Chenlei Leng and Ji Zhu 31
Near-optimal estimation of jump activity in semimartingales . . . . . Adam D. Bull 58
Inference using noisy degrees: Differentially private β-model and synthetic graphs
Vishesh Karwa and Aleksandra Slavković 87
Optimal designs in regression with correlated errors
Holger Dette, Andrey Pepelyshev and Anatoly Zhigljavsky 113
Asymptotics for change-point models under varying degrees of mis-specification
Rui Song, Moulinath Banerjee and Michael R. Kosorok 153
Functional data analysis for density functions by transformation to a Hilbert space
Alexander Petersen and Hans-Georg Müller 183
Projected principal component analysis in factor models
Jianqing Fan, Yuan Liao and Weichen Wang 219
Adaptation to lowest density regions with application to support recovery
Tim Patschkowski and Angelika Rohde 255
Partially linear additive quantile regression in ultra-high dimension
Ben Sherwood and Lan Wang 288
Rate exact Bayesian adaptation with modified block priors
Chao Gao and Harrison H. Zhou 318
Graph connection Laplacian methods can be made robust to noise
Noureddine El Karoui and Hau-Tieng Wu 346
Optimization via low-rank approximation for community detection in networks
Can M. Le, Elizaveta Levina and Roman Vershynin 373
A goodness-of-fit test for stochastic block models . . . . . Jing Lei 401
Estimation for single-index and partially linear single-index integrated models
Chaohua Dong, Jiti Gao and Dag Tjøstheim 425

Vol. 44, No. 1—February 2016
