

# Pacific Journal of Mathematics

<b>E. Atencia and F. J. Martin-Reyes</b> , The maximal ergodic Hilbert transform with weights . . . . .	257
<b>B. E. Blackadar</b> , The regular representation of local affine motion groups . . . . .	265
<b>A. Dow</b> , On $F$ -spaces and $F'$ -spaces . . . . .	275
<b>Y. Kato</b> , On the vector fields on an algebraic homogeneous space . . . . .	285
<b>D. Khavinson</b> , Factorization theorems for different classes of analytic functions in multiply connected domains . . . . .	295
<b>W.-E. Kuan</b> , A note on primary powers of a prime ideal . . . . .	319
<b>B. M. Mann and E. Y. Miller</b> , Characteristic classes for spherical fibrations with fibre-preserving free group actions . . . . .	327
<b>S. Pax</b> , Appropriate cross-sectionally simple four-cells are flat . . . . .	379
<b>R. K. Rai</b> , On orthogonal completion of reduced rings . . . . .	385
<b>V. S. H. Rao</b> , On random solutions of Volterra-Fredholm integral equations . . . . .	397
<b>T. Sato</b> , Integral comparison theorems for relative Hardy spaces of solutions of the equations $\Delta u = Pu$ on a Riemann surface . . . . .	407
<b>P. Selick</b> , A reformulation of the Arf invariant one mod $p$ problem and applications to atomic spaces . . . . .	431
<b>R. J. Stroeker</b> , Reduction of elliptic curves over imaginary quadratic number fields . . . . .	451
<b>J. Towber</b> , Natural transformations of tensor-products of representation-functors I, Combinatorial preliminaries . . . . .	465
<b>J. C. S. Wong and A. Riazi</b> , Characterisations of amenable locally compact semi-groups . . . . .	479
