Articles

H. F. de Lima, E. A. Lima Jr., Entire spacelike H -graphs in Lorentzian product spaces	273–287
V. Dimant, P. Sevilla-Peris, Summation of coefficients of polynomials on ℓ_p spaces	289–310
N. Q. Dieu, P. V. Manh, P. H. Bang, L. T. Hung, Vitali's theorem without uniform boundedness	311–334
G. David, A monotonicity formula for minimal sets with a sliding boundary condition	335–450
M. Egert, R. Haller-Dintelmann, P. Tolksdorf, The Kato Square Root Problem follows from an extrapolation property of the Laplacian	451–483
W. Zhao, M. Wang, G. Zhao, Integral restriction for bilinear operators	485–500
J. Belk, F. Matucci, Röver's simple group is of type F_∞	501–524
L. C. F. Ferreira, L. S. M. Lima, Global well-posedness and symmetries for dissipative active scalar equations with positive-order couplings	525–550
L. G. Brown, Convergence of functions of self-adjoint operators and applications	551–564
M. Hosseini, F. Sady, Common zeros preserving maps on vector-valued function spaces and Banach modules	565–582
