

Note to the author

All manuscripts should be double-spaced, and the author should keep a complete copy. Footnotes should be double-spaced, on a separate page. Figures should be drawn separately in black ink on white paper suitable for being photographed. Explain unusual symbols and handwritten symbols, and identify special typefaces such as bold, Gothic (German), script. Include a hard copy even if your manuscript has been electronically prepared in AMS-TEX or AMS-LATEX . In the latter case please submit your style files and font files with the AMS-TEX or AMS-LATEX diskette of your paper.

Include the primary and secondary subject classification numbers. The 1991 Mathematics Subject Classification can be found in the annual subject index volume of Mathematical Reviews.

Proof

Authors will receive only galley proof. Proof sent to North American addresses will be accompanied by manuscript and sent by first class mail. To other addresses, proof will be sent by airmail, and manuscript will be sent only if requested. Authors are asked to return proof (and manuscript if sent) by the same class of mail that was used in sending it to them.

Page charges

To cover a part of the cost of production, the author's institution will be billed for \$40 per page.

Offprints

One hundred offprints are supplied to the sole author of a paper; fifty free offprints are supplied to each author of a joint paper. Additional offprints may be purchased.

	Page
De Branges spaces contained in some Banach spaces of analytic functions By DINESH SINGH and SANJEEV AGRAWAL	351
Algorithms for the complete decomposition of a closed 3-manifold By WILLIAM JACO and JEFFREY L. TOLLEFSON	358
Free groups and unification in $\mathfrak{A}_m \mathfrak{A}_2$ By MICHAEL H. ALBERT and DAVID PATRICK	407
Stability of some types of Radon-Nikodym properties By NARCISSE RANDRIANANTOANINA and ELIAS SAAB	416
Factorization of composition operators through Bloch type spaces By HANS JARCHOW and REINHARD RIEDL	431
An extremal property of contraction semigroups in Banach spaces By JEROME A. GOLDSTEIN and BELA NAGY	441
Parametrizing the solutions of an analytic differential equation By LOU VAN DEN DRIES	450
On the set of topologically invariant means on the von Neumann algebra $VN(G)$ By ZHIGUO HU	463
Minimizing norms of polynomials under constraints on the distribution of the roots By FRANCK BEAUCOUP	491
Lower bounds for the mean curvature of hollow tubes around complex hypersurfaces and totally real submanifolds By VICENTE MIQUEL AND VICENTE PALMER	508
