

**CORRIGENDUM TO THE PAPER "THE MATHEMATICAL
WORK OF EDUARD WIRSING"**

(Functiones et Approximatio 35 (2006), 7–18)

ANDRZEJ SCHINZEL & WOLFGANG M.SCHMIDT

The sentence on p. 12, lines 12–14 should run as follows. The present record due to Lu Wen Chao is

$$\psi(x) = x + O(x \exp(-(\log x)^\theta))$$

for all $\theta < 1/2$ (see Rocky Mountain J. Math. 29 (1999), 979–1053 and the review by Nigel Watt in Math. Reviews 2001 a: 11155).

Moreover, the following misprints should be corrected:

- p. 8, line 13: for [43] read [43], [44]
- p. 11, line 4: for union read union of
- p. 11, line -3: for by read but
- p. 15, line 23: for numbers read numbers of
- p. 17, line 2: for overrationals read irrationals
