Abdous, B. <i>Estimation of bivariate excess probabilities for elliptical models</i>	1065
Aue, A. <i>Selection from a stable box</i>	125
Aue, A. <i>Testing for changes in polynomial regression</i>	637
Bardet, J.-M. <i>Adaptive wavelet-based estimator of the memory parameter for stationary Gaussian processes</i>	691
Barndorff-Nielsen, O.E. <i>Probability measures, Lévy measures and analyticity in time</i>	764
Bender, C. <i>Stochastic calculus for convoluted Lévy processes</i>	499
Berg, C. <i>The Dagum family of isotropic correlation functions</i>	1134
Berkes, I. <i>Selection from a stable box</i>	125
Bibi, H. <i>Adaptive wavelet-based estimator of the memory parameter for stationary Gaussian processes</i>	691
Bobacka, K. <i>Kshirsagar–Tan independence property of beta matrices and related characterizations</i>	749
Butler, R.W. <i>Uniform saddlepoint approximations for ratios of quadratic forms</i>	140
Cappé, O. <i>Sequential Monte Carlo smoothing with application to parameter estimation in nonlinear state space models</i>	155
Cascos, I. <i>Consistency of the <math>\alpha</math>-trimming of a probability. Applications to central regions</i>	580
Cheng, T.-L. <i>On Berry–Esseen bounds for non-instantaneous filters of linear processes</i>	301
Darses, S. <i>Asymptotic expansions at any time for scalar fractional SDEs with Hurst index <math>H &gt; 1/2</math></i>	822
Delaigle, A. <i>Density estimation with heteroscedastic error</i>	562
Denisov, D. <i>On lower limits and equivalences for distribution tails of randomly stopped sums</i>	391
Di Nardo, E. <i>A unifying framework for <math>k</math>-statistics, polykays and their multivariate generalizations</i>	440
Dony, J. <i>Uniform in bandwidth consistency of conditional <math>U</math>-statistics</i>	1108
Douc, R. <i>Sequential Monte Carlo smoothing with application to parameter estimation in nonlinear state space models</i>	155
Einmahl, J.H.J. <i>Statistics of extremes under random censoring</i>	207
Einmahl, J.H.J. <i>A method of moments estimator of tail dependence</i>	1003
Fils-Villetard, A. <i>Statistics of extremes under random censoring</i>	207
Foss, S. <i>On lower limits and equivalences for distribution tails of randomly stopped sums</i>	391
Fougères, A.-L. <i>Estimation of bivariate excess probabilities for elliptical models</i>	1065

Genton, M.G. <i>On the asymptotic joint distribution of sample space–time covariance estimators</i>	228
Ghoubi, K. <i>Estimation of bivariate excess probabilities for elliptical models</i>	1065
Giné, E. <i>A simple adaptive estimator of the integrated square of a density</i>	47
Giraud, C. <i>Mixing least-squares estimators when the variance is unknown</i>	1089
Goldenshluger, A. <i>Universal pointwise selection rule in multivariate function estimation</i>	1150
Gottschalk, H. <i>The Feynman graph representation of convolution semigroups and its applications to Lévy statistics</i>	322
Guarino, G. <i>A unifying framework for <math>k</math>-statistics, polykays and their multivariate generalizations</i>	440
Guillou, A. <i>Statistics of extremes under random censoring</i>	207
Gut, A. <i>Laws of the single logarithm for delayed sums of random fields</i>	249
Gyöngy, I. <i>On randomized stopping</i>	352
Ho, H.-C. <i>On Berry–Esseen bounds for non-instantaneous filters of linear processes</i>	301
Hörmann, S. <i>Augmented GARCH sequences: Dependence structure and asymptotics</i>	543
Horváth, L. <i>Selection from a stable box</i>	125
Horváth, L. <i>Sample autocovariances of long-memory time series</i>	405
Horváth, L. <i>Testing for changes in polynomial regression</i>	637
Houdré, C. <i>Concentration for norms of infinitely divisible vectors with independent components</i>	926
Hu, J. <i>Asymptotic normality and consistency of a two-stage generalized least squares estimator in the growth curve model</i>	623
Hubalek, F. <i>Probability measures, Lévy measures and analyticity in time</i>	764
Hult, H. <i>Tail probabilities for infinite series of regularly varying random vectors</i>	838
Hušková, M. <i>Testing for changes in polynomial regression</i>	637
Jacod, J. <i>Estimation of the Brownian dimension of a continuous Itô process</i>	469
Jagers, P. <i>General branching processes in discrete time as random trees</i>	949
Jónsdóttir, K.Ý. <i>Lévy-based growth models</i>	62
Jouini, A. <i>Adaptive wavelet-based estimator of the memory parameter for stationary Gaussian processes</i>	691
Khoshnevisan, D. <i>Level sets of the stochastic wave equation driven by a symmetric Lévy noise</i>	899
Kokoszka, P. <i>Sample autocovariances of long-memory time series</i>	405
Kokoszka, P. <i>Testing for changes in polynomial regression</i>	637
Koloydenko, A. <i>The adjusted Viterbi training for hidden Markov models</i>	180
Koloydenko, A. <i>Symmetric measures via moments</i>	362
Korshunov, D. <i>On lower limits and equivalences for distribution tails of randomly stopped sums</i>	391
Krajina, A. <i>A method of moments estimator of tail dependence</i>	1003

Leeb, H. <i>Evaluation and selection of models for out-of-sample prediction when the sample size is small relative to the complexity of the data-generating process</i>	661
Lejay, A. <i>Estimation of the Brownian dimension of a continuous Itô process</i>	469
Lember, J. <i>The adjusted Viterbi training for hidden Markov models</i>	180
Lepski, O. <i>Universal pointwise selection rule in multivariate function estimation</i>	1150
Li, B. <i>On the asymptotic joint distribution of sample space–time covariance estimators</i>	228
López-Díaz, M. <i>Consistency of the <math>\alpha</math>-trimming of a probability. Applications to central regions</i>	580
Maller, R.A. <i>GARCH modelling in continuous time for irregularly spaced time series data</i>	519
Marchal, P. <i>Concentration for norms of infinitely divisible vectors with independent components</i>	926
Marquardt, T. <i>Stochastic calculus for convoluted Lévy processes</i>	499
Mason, D.M. <i>Uniform in bandwidth consistency of conditional U-statistics</i>	1108
Mateu, J. <i>The Dagum family of isotropic correlation functions</i>	1134
McCullagh, P. <i>Marginal likelihood for parallel series</i>	593
McCullagh, P. <i>Gibbs fragmentation trees</i>	988
Meerschaert, M. <i>Local times of multifractional Brownian sheets</i>	865
