

ILLINOIS JOURNAL OF MATHEMATICS

Volume 54, Number 4

Winter 2010

Olivier Raimond and Bruno Schapira , Random walks with occasionally modified transition probabilities	1213
Karel Janeček and Steven E. Shreve , Futures trading with transaction costs	1239
Marc Arnaudon and Anton Thalmaier , The differentiation of hypoelliptic diffusion semigroups	1285
M. Cranston and G. Mueller , On the association and central limit theorem for solutions of the parabolic Anderson model	1313
Daniel Conus and Davar Khoshnevisan , Weak nonmild solutions to some SPDEs	1329
Daniel W. Stroock , Maps that take Gaussian measures to Gaussian measures	1343
Zhen-Qing Chen, Panki Kim and Renming Song , Dirichlet heat kernel estimates for $\Delta^{\alpha/2} + \Delta^{\beta/2}$	1357
Vasily Vasyunin and Alexander Volberg , Burkholder's function via Monge–Ampère equation	1393
Robert O. Bauer , A simple construction of Werner measure from chordal $\text{SLE}_{8/3}$	1429
Peter A. Loeb , Representing measures in potential theory and an ideal boundary	1451
Vilmos Prokaj and Walter Schachermayer , Hiding a constant drift—a strong solution	1463
K. Burdzy, C. Mueller and E. A. Perkins , Nonuniqueness for nonnegative solutions of parabolic stochastic partial differential equations	1481
Prabhu Janakiraman , Orthogonality in complex martingale spaces and connections with the Beurling–Ahlfors transform	1509
