

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

Heavy-tailed configuration models at criticality <i>S. Dbará, R. van der Hofstad, J. S. H. van Leeuwaarden and S. Sen</i>	1515–1558
Non-asymptotic Gaussian estimates for the recursive approximation of the invariant distribution of a diffusion <i>I. Honoré, S. Menozzi and G. Pagès</i>	1559–1605
The Skorokhod embedding problem for inhomogeneous diffusions <i>S. Ankirchner, S. Engelhardt, A. Fromm and G. dos Reis</i>	1606–1640
Global universality of Macdonald plane partitions <i>A. Abn</i>	1641–1705
Sampling of probability measures in the convex order by Wasserstein projection <i>A. Alfonsi, J. Corbetta and B. Jourdain</i>	1706–1729
Discrete rough paths and limit theorems <i>Y. Liu and S. Tindel</i>	1730–1774
Existence, uniqueness and coalescence of directed planar geodesics: Proof via the increment-stationary growth process <i>T. Seppäläinen</i>	1775–1791
On temporal regularity of stochastic convolutions in 2-smooth Banach spaces <i>M. Ondreját and M. Veraar</i>	1792–1808
Superdiffusions with super-exponential growth: Construction, mass and spread <i>Z.-Q. Chen and J. Engländer</i>	1809–1840
The Green's function on the double cover of the grid and application to the uniform spanning tree trunk <i>R. W. Kenyon and D. B. Wilson</i>	1841–1868
Thresholds for vanishing of 'Isolated' faces in random Čech and Vietoris–Rips complexes <i>S. K. Iyer and D. Yogeswaran</i>	1869–1897
Spread of an infection on the zero range process <i>R. Baldasso and A. Teixeira</i>	1898–1928
Hypothesis testing via Euclidean separation <i>V. Guigues, A. Juditsky and A. Nemirovski</i>	1929–1957
Stability and mean-field limits of age dependent Hawkes processes <i>M. B. Raad, S. Ditlevsen and E. Löcherbach</i>	1958–1990
Random permutations with logarithmic cycle weights <i>N. Robles and D. Zeindler</i>	1991–2016
Exceptional graphs for the random walk <i>J. Aru, C. Groenland, T. Johnston, B. Narayanan, A. Roberts and A. Scott</i>	2017–2027
On boundary detection <i>C. Aaron and A. Cholaquidis</i>	2028–2050
On stiff problems via Dirichlet forms <i>L. Li and W. Sun</i>	2051–2080
Bayesian linear inverse problems in regularity scales <i>S. Gugusvili, A. van der Vaart and D. Yan</i>	2081–2107
On principal curves with a length constraint <i>S. Delattre and A. Fischer</i>	2108–2140
Spectral radii of sparse random matrices <i>F. Benaych-Georges, C. Bordenave and A. Knowles</i>	2141–2161
Performance guarantees for policy learning <i>A. Luedtke and A. Chambaz</i>	2162–2188
Diffusive scaling of the Kob–Andersen model in $\mathbb{Z}^d$ <i>F. Martinelli, A. Shapira and C. Toninelli</i>	2189–2210
An entropic interpolation problem for incompressible viscous fluids <i>M. Arnaudon, A. B. Cruzeiro, C. Léonard and J.-C. Zambrini</i>	2211–2235
Noise reinforcement for Lévy processes <i>J. Bertoin</i>	2236–2252
Stability of the logarithmic Sobolev inequality via the Föllmer process <i>R. Eldan, J. Lebec and Y. Shenfeld</i>	2253–2269
Concentration of Markov chains with bounded moments <i>A. Naor, S. Rao and O. Regev</i>	2270–2280
