STATISTICS

*AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS*

Discussion Paper

Slice sampling.....	RADFORD M. NEAL	705
Discussion.....	MING-HUI CHEN AND BRUCE W. SCHMEISER	742
Discussion	OLIVER B. DOWNS	743
Discussion	ANTONIETTA MIRA AND GARETH O. ROBERTS	748
Discussion	JOHN SKILLING AND DAVID J. C. MACKAY	753
Discussion	S. G. WALKER	755
Rejoinder.....	RADFORD M. NEAL	758

Hypothesis Analysis

How do bootstrap and permutation tests work?	ARNOLD JANSEN AND THORSTEN PAULS	768
Asymptotics for likelihood ratio tests under loss of identifiability	XIN LIU AND YONGZHAO SHAO	807
Likelihood ratio of unidentifiable models and multilayer neural networks	KENJI FUKUMIZU	833
Moderate deviations of minimum contrast estimators under contamination	TADEUSZ INGLOT AND WILBERT C. M. KALLENBERG	852
Nonparametric comparison of regression curves: An empirical process approach	NATALIE NEUMEYER AND HOLGER DETTE	880

Sequential Analysis

Sequential methods for design-adaptive estimation of discontinuities in regression curves and surfaces	PETER HALL AND ILYA MOLCHANOV	921
SPRT and CUSUM in hidden Markov models.....	CHENG-DER FUH	942

Experimental Design

Universal optimality of balanced uniform crossover designs	A. S. HEDAYAT AND MIN YANG	978
Indicator function and its application in two-level factorial designs	KENNY Q. YE	984
Structure function for aliasing patterns in 2^{l-n} design with multiple groups of factors	YU ZHU	995
Hidden projection properties of some nonregular fractional factorial designs and their applications	DURSUN A. BULUTOGLU AND CHING-SHUI CHENG	1012

Correction

Approximate p -values for local sequence alignments	DAVID SIEGMUND AND BENJAMIN YAKIR	1027
