

MATHEMATICAL REVIEWS

A Journal Containing Reviews
of the Mathematical Literature
of the World, with full
Subject and Author Indices

Sponsored by

The American Mathematical Society
*The Mathematical Association of
America*

*The Society for Industrial and
Applied Mathematics*

*The Institute of Mathematical
Statistics*

The Edinburgh Mathematical Society

Société Mathématique de France

Dansk Matematisk Forening

*Het Wiskundig Genootschap te
Amsterdam*

The London Mathematical Society

Polskie Towarzystwo Matematyczne

Unión Matemática Argentina

Indian Mathematical Society

Unione Matematica Italiana

Subscriptions accepted to cover
the calendar year only. Issues ap-
pear monthly except July. \$35.00
per year. \$12.00 to members of
sponsoring organizations. An edi-
tion printed on one side, for bib-
liographical purposes, is available
at an additional charge of \$1.00
per year. Unesco Book Coupons
may be used in payment.

**AMERICAN MATHEMATICAL
SOCIETY**

**190 Hope Street
Providence 6, R.I.**

Now in its fourth year, America's
foremost paperback series of low-cost
quality books offers more than 100
titles in every field of interest. Widely
used as classroom texts and for sup-
plementary reading, Anchor Books
belong in the permanent library of
every serious reader.

G. Polya

HOW TO SOLVE IT. An outstanding
mathematician shows how a unique
approach to mathematics can be ap-
plied to solve problems in any other,
more or less technical, area. 95¢

Galileo

**DISCOVERIES AND OPINIONS OF
GALILEO.** Here are four of Galileo's
writings on astronomy that form the
basis of his lifelong battle to estab-
lish the validity of Copernican cos-
mology and the scientific method.
Translated, with an introduction, by
Stillman Drake. 95¢

Tobias Dantzig

**NUMBER: THE LANGUAGE OF SCI-
ENCE.** The most informative, fascinat-
ing book yet written on the evolution
of the concept of number—from its
beginnings among primitives, its de-
velopment in the ancient world, and
the strange types of numbers used
in higher mathematics today. 95¢

For a complete list, ask your
bookseller or write to Doubleday
Anchor Books, 575 Madison Ave-
nue, New York 22.

Do you belong in IBM Applied Science?

This Consulting Job is now open!

Before his recent promotion, this man was an IBM Applied Science representative, working out of the New York office. During the past two years, he has shown innumerable customers how to do things electronically. For example, an aircraft manufacturer wanted to experiment with a radically different design for a nuclear reactor. Months of toil with mathematical equations were indicated. But this Applied Science Consultant was able to map out a program that saved the manufacturer over 100 days of pencil-chewing arithmetic. Later, for this same company, he organized the establishment of computer systems for aircraft performance predictions and for wing stress analysis.

Could you fill it?

Rewarding careers are now open to men with degrees in:

- **Mathematics**
- **Physics**
- **Engineering**
- **Chemistry**
- **Statistics**
- **Economics**

IBM Applied Science has quadrupled its staff during the past three years. In 1956, over 70 promotions were conferred. Doesn't this growth factor alone suggest more room for your abilities—more professional stature?

Why not act today? Write, outlining the details of your background and interests, to:

P. H. Bradley
Dept. 10603
IBM Corporation
590 Madison Avenue
New York 22, N. Y.

Be sure to visit the IBM booth at the I. R. E. Show, March 18 through 21.

**DATA PROCESSING
ELECTRIC TYPEWRITERS
TIME EQUIPMENT
MILITARY PRODUCTS**

Responsibilities:

- Advise customers and prospects in regard to the scientific and technical applications of IBM electronic equipment.
- Analyze customer's technical problems in terms of machines and their applications for the mutual benefit of the customer and IBM.
- Deliver talks about the computing field—supported by demonstrations—to customers, prospects, scientific groups, and IBM personnel.
- Maintain constant and close contact with the customer's top management and associated IBM executive.
- Continually analyze customer applications and develop new machine uses.

IBM maintains approximately 100 Applied Science offices throughout the length and breadth of the United States. You may request assignment in the location that is most desirable to you.

HOME OFFICE:

Boston

Thorough treatment of advanced calculus in this widely used text. Emphasis on sound understanding of concepts and basic principles of analysis—those properties of the real number system which support the theory of limits and continuity. Includes elementary point-set theory. Many exercises and problems, with answers to over half.

Ginn and Company

opportunities for

mathematicians and statisticians

at the

GENERAL ELECTRIC RESEARCH LABORATORY

The Information Studies Section of the General Electric Research Laboratory in Schenectady has several challenging opportunities for mathematicians and statisticians who are prepared for and interested in pursuing a career of fundamental research in such fields as the logic of information processing machines, and information theory.

Prompt attention will be given to inquiries addressed to Dr. Lewis Eldred, Research Laboratory, General Electric Company, Box 1088, Schenectady, New York.

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings, with abstracts of all research papers presented. It contains some of the officially invited addresses presented before the Society, and reviews of advanced mathematical books.

The subscription price is \$7.00 per annual volume of six numbers.

Invited addresses offered for publication should be sent to B. J. PETTIS, Department of Mathematics, Tulane University, New Orleans 18, La.; Research problems to G. B. PRICE, Department of Mathematics, University of Kansas, Lawrence, Kan.; Book reviews to J. C. OXToby, Bryn Mawr College, Bryn Mawr, Pa. All other communications to the editors should be addressed to the Managing Editor, G. B. PRICE.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length.

The subscription price is \$11.00 per annual volume of six numbers.

Papers in algebra, number theory, logic and foundations should be sent to IRVING KAPLANSKY, Fine Hall, Princeton, New Jersey (until June 1, 1957; thereafter to Eckhart Hall, University of Chicago, Chicago 37, Ill.); in geometry and topology to HANS SAMELSON, Department of Mathematics, University of Michigan, Ann Arbor, Mich.; in probability, real variables and abstract analysis to SHIZUO KAKUTANI, Leet Oliver Memorial Hall, Yale University, New Haven 11, Conn.; in other branches of analysis, applied mathematics, and all other fields to R. P. BOAS, Lunt Building, Northwestern University, Evanston, Ill. All other communications to the editors should be addressed to the Managing Editor, R. P. BOAS.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Three volumes of two numbers each will be published in 1957. The subscription price is \$8.00 per volume.

Papers in geometry, differential equations and functions of complex variables should be sent to S. S. CHERN, Department of Mathematics, University of Chicago, Chicago 37, Ill.; in algebra and number theory to A. H. CLIFFORD, Newcomb College, Tulane University, New Orleans 18, La.; in analysis (except for differential equations and functions of a complex variable), applied mathematics and probability to Professor MARK KAC, White Hall, Cornell University, Ithaca, New York; in topology, logic and foundations to W. S. MASSEY, Department of Mathematics, Brown University, Providence 12, R. I. All other communications to the editors should be addressed to the Managing Editor, W. S. MASSEY.

Memoirs of the American Mathematical Society

This series is devoted to the publication of research monographs in pure and applied mathematics. The memoirs are issued serially, but not periodically. Each issue consists of either a single monograph or a group of cognate papers and is priced separately according to size and cost of publication. The editorial standards for acceptance are the same as for the TRANSACTIONS and manuscripts intended for publication should be submitted to the appropriate editor of the TRANSACTIONS. All other communications to the editors should be addressed to S. S. CHERN.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

MATHEMATICAL REVIEWS is published monthly, excepting July. The subscription price is \$35.00 per annual volume of eleven numbers.

OFFICIAL COMMUNICATIONS

MEETINGS OF THE SOCIETY

Abstracts for all meetings of the Society should be sent to the American Mathematical Society, 190 Hope St., Providence 6, R. I.

NEW YORK, NEW YORK, April 5-6, 1957.

Abstracts must be received not later than February 20. By invitation of the Committee to Select Hour Speakers for Eastern Sectional Meetings there will be an address by Professor Friedman and one by Professor R. V. Kadison entitled *A survey of the theory of operator algebras*.

CHICAGO, ILLINOIS, April 19-20, 1957.

Abstracts must be received not later than February 20. By invitation of the Committee to Select Hour Speakers for Western Sectional Meetings there will be an address by Professor Rene Thom entitled *Topology of differentiable function spaces*.

BERKELEY, CALIFORNIA, April 20, 1957.

Abstracts must be received not later than February 20. By invitation of the Committee to Select Hour Speakers for Far Western Sectional Meetings there will be an address by Professor A. L. Whiteman.

PULLMAN, WASHINGTON, June 15, 1957.

Abstracts must be received not later than May 2. There will be an address by Professor M. M. Day entitled *Rotundity and smoothness*.

SUMMER MEETING, UNIVERSITY PARK, PENNSYLVANIA, August 26-30, 1957.

Abstracts must be received not later than July 12. Professor N. E. Steenrod will deliver the Colloquium Lectures.

WASHINGTON, D. C., October 26, 1957.

Abstracts must be received not later than September 12.

J. W. GREEN, *Secretary of the Society*
