

CHINESE MATHEMATICS ACTA

This is a cover-to-cover translation into English of Acta Mathematica Sinica, published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics. Starting with volume 1, 1960 (available in July, 1962), Chinese Mathematics will appear quarterly or as published. Volume 1 will have three issues; volume 2 four issues. About 650 pages a year.

CONTENTS

Vol. 6, No. 3

September, 1962

	Page
Cohomology of Lie groups By G. HOCHSCHILD AND G. D. MOSTOW.	367
Markov processes with identical hitting distributions By R. M. BLUMENTHAL, R. K. GETTOOR, AND H. P. MCKEAN, JR.	402
Some remarks on Cernikov p -groups By NORMAN BLACKBURN.	421
Flag-transitive collineation groups of finite projective spaces By D. G. HIGMAN.	434
Representation of invariant measures By R. H. FARRELL.	447
On a theorem of Chern By PHILLIP A. GRIFFITHS.	468
The structure of some subgroups of the modular group By MORRIS NEWMAN.	480
On connected normed algebras whose norms satisfy a reality condition By SILVIO AURORA.	488
Mathematical characterization of the physical vacuum for a linear Bose-Einstein field (Foundations of the dynamics of infinite systems III) By I. E. SEGAL.	500
On the decomposition theory for Krull valuations By P. RIBENBOIM.	524

Published by the University of Illinois Press in March, June, September and December. Supported in part by the George A. Miller Endowment. Printed by Weyerly Press, Baltimore, Maryland.

The subscription price is \$9.00 a volume (four numbers); this is reduced to \$5.00 for individual members of the American Mathematical Society. The price of a single number is \$3.00. Subscriptions should be sent to the University of Illinois Press, Urbana, Illinois.
