**ANN ARBOR, MICHIGAN, U.S.A.**

**ISSN 0026-2285**

The Michigan Mathematical Journal is published by the Department of Mathematics at the University of Michigan and endeavors to publish significant research articles in all areas of mathematics. One volume is published each year, and each volume consists of three issues. The subscription price is \$80 per volume (postage included); single issues may be purchased for \$30. Subscriptions intended for the private use of individuals are available at the reduced rate of \$45 per volume.

Subscription orders should be sent to Marsha Spickenagel, Subscription Secretary, Michigan Mathematical Journal, Department of Mathematics, University of Michigan, Ann Arbor, Michigan, 48109. All subscriptions must be prepaid in U.S. funds. The Journal will accept payment for subscriptions one, two, or three years in advance. Checks and money orders should be made payable to the Michigan Mathematical Journal.

Volumes 12 through 23 (1965–1976) consist of four issues per volume; earlier volumes vary in size from one to three issues. Volumes 12 through 40 may be purchased from the publisher at the price of \$80 per volume. Volumes 1 through 9 are no longer available from the University of Michigan; they may be purchased from the Johnson Reprint Corporation, 111 Fifth Avenue, New York, N.Y., 10003. Volumes 10 and 11 are not available.

To submit a paper for publication, an author should send two copies of the manuscript to the Editor, Michigan Mathematical Journal, University of Michigan, Ann Arbor, Michigan, 48109. The submission of a paper implies the author's assurance that it has not been copyrighted, published, or submitted for publication elsewhere. Preference will be given to manuscripts between ten and forty pages in length. All authors of papers accepted for publication will be required to sign a transfer of copyright agreement.

To help defray the cost of publication of the journal, page charges of \$40 per printed page will be billed to the author's institution. If the institution is unable to pay any charges, the author will be asked to pay a nominal fee for 100 offprints; joint authors will share the 100 offprints.

Authors should strive for expository clarity and good literary style. Manuscripts lacking in these respects will not be published. Manuscripts submitted for publication should be neatly typed on one side of the page only, *double spaced* (including references), with generous margins. Hand inserted symbols should be well-spaced and legible; unusual symbols and complicated combinations of symbols should be avoided. Acknowledgments of grant support should be placed after the references, which should be listed in alphabetical–chronological order. References to articles and books should be in the standard form with the standard abbreviations established by Mathematical Reviews. Diagrams should be drawn in black on separate sheets of white paper; the original art should be submitted along with a xerographic copy.

# Contents

	PAGE
Self-Duality and 4-Manifolds with Nonnegative Curvature on Totally Isotropic 2-Planes <i>Maria Helena Noronha</i> .....	3
The Bers–Nielsen Kernels and Souls of Open Surfaces with Negative Curvature <i>Jianguo Cao</i> .....	13
A Remark on Quasiconformal Mappings on Carnot Groups <i>G. D. Mostow</i> .....	31
Spectral Types of Unitary Operators Arising from Irrational Rotations on the Circle Group <i>Herbert A. Medina</i> .....	39
A Note on Hardy Spaces and Functions of Bounded Mean Oscillation on Domains in $\mathbb{C}^n$ <i>Steven G. Krantz &amp; Song-Ying Li</i> .....	51
Interpolating Sequences for the Bergman Space <i>Kehe Zhu</i> .....	73
Noncollarable Ends of 4-Manifolds: Some Realization Theorems <i>Craig R. Guilbault</i> .....	87
A Factorization Theorem for Smooth Crossed Products <i>Larry B. Schweitzer</i> .....	97
Removable Singularities for $L^p$ CR Functions <i>John T. Anderson &amp; Joseph A. Cima</i> .....	111
Automorphisms of Negatively Curved Polygonal Amalgams <i>John Meier</i> .....	121
$n$ -Harmonic Morphisms in Space Are Möbius Transformations <i>Juan J. Manfredi &amp; Vincenzo Vespri</i> .....	135
On CR Mappings of Real Quadric Manifolds <i>Alexandr Sukhov</i> .....	143

Self-Similar Solutions of the Pseudo-Conformally Invariant Nonlinear Schrödinger Equation <i>Otařed Kavian &amp; Fred B. Weissler</i> .....	151
Coarsely Quasi-Homogeneous Circle Packings in the Hyperbolic Plane <i>Zheng-Xu He</i> .....	175
Cohomology of the Symplectic Group $\mathrm{Sp}(4, \mathbf{Z})$ , Part II: Computations at the Prime 2 <i>Alan Brownstein &amp; Ronnie Lee</i> .....	181
