CONTENTS

William G. Bade, <i>Operators with spectrum in a strip</i>	257
E. F. Beckenbach and L. K. Jackson, <i>Subfunctions of several variables</i>	291
David Blackwell, <i>Extension of a renewal theorem</i>	315
H. Busemann, <i>Volume in terms of concurrent cross-sections</i>	1
L. Carlitz, <i>Some special equations in a finite field</i>	13
L. Carlitz, <i>Some theorems on the Schur derivative</i>	321
L. Carlitz, <i>Some theorems on generalized Dedekind sums</i>	513
L. Carlitz, <i>The reciprocity theorem of Dedekind sums</i>	523
Paul L. Clement, <i>Generalized convexity and surfaces of negative curvature</i>	333
H. V. Craig and B. B. Townsend, <i>On certain metric extensors</i>	25
P. Davis and H. Pollak, <i>Linear functionals and analytic continuation</i>	47
J. C. E. Dekker, <i>Maximal dual ideals in Boolean algebras</i>	73
P. Erdős and G. A. Hunt, <i>Changes of sign of sums of random variables</i>	673
P. Erdős and E. G. Straus, <i>Linear independence of sequences in Banach space</i> .	689
Edward R. Fadell, <i>Identifications in singular homology theory</i>	529
Harley Flanders, <i>The norm functions of an algebraic field extension</i>	103
Harley Flanders, <i>A method of general linear frames in Riemannian geometry</i>	551
Merrill M. Flood, <i>On the Hitchcock distribution problem</i>	369
W. Fulks, <i>On the unique determination of solutions of the heat equation</i>	387
W. Fulks, <i>The Neumann problem for the heat equation</i>	567
P. R. Garabedian, <i>Orthogonal harmonic polynomials</i>	585
A. M. Gleason. See R. E. Greenwood and A. M. Gleason.....	605
John W. Green, <i>Length and area of convex curve under affine transformation</i>	393
R. E. Greenwood and A. M. Gleason, <i>Distribution of round-off errors</i>	605
William Gustin, <i>An isoperimetric minimax</i>	403
M. Hall, Jr., <i>Subgroups of free products</i>	115
Haim Hanani, <i>On sums of series of complex numbers</i>	695
Melvin Henriksen, <i>On the prime ideals of the ring of entire functions</i>	711
I. N. Herstein, <i>Finite multiplicative subgroups in division rings</i>	121
J. L. Hodges, Jr. and M. Rosenblatt, <i>Recurrence-time moments in random walks</i> .	127
A. Horn, <i>Normal completion of a subset of a complete lattice</i>	143
G. A. Hunt. See P. Erdős and G. A. Hunt.....	673
L. K. Jackson. See E. F. Beckenbach and L. K. Jackson.....	291
Irving Kaplansky, <i>Completely continuous normal operators with property L</i>	721
Samuel Karlin, <i>Some random walks arising in learning models I</i>	725

F. Koehler, <i>Estimates for errors in Rayleigh-Ritz method</i>	153
W. J. LeVeque, <i>On uniform distribution modulo a subdivision</i>	737
Arthur E. Livingston, <i>Hausdorff means which exhibit the Gibbs' phenomenon</i>	407
Arthur E. Livingston, <i>The space H^p, $0 < p < 1$, is not normable</i>	613
Charles Loewner, <i>On generation of solutions of the biharmonic equation</i>	417
Lee Lorch, <i>Derivatives of infinite order</i>	773
M. H. Martin, <i>The Monge-Ampère partial differential equation</i>	165
Samuel Marx and George Piranian, <i>Lipschitz functions of continuous functions</i> ..	447
J. E. Maxfield, <i>Normal k-tuples</i>	189
J. E. McLaughlin, <i>Relatively complemented lattices</i>	197
Ernest Michael, <i>Some extension theorems for continuous functions</i>	789
M. N. Mikhail, <i>Order of the reciprocal set of a basic set of polynomials</i>	617
W. H. Mills, <i>A system of quadratic diophantine equations</i>	209
L. J. Mordell, <i>On the linear independence of algebraic numbers</i>	625
T. S. Motzkin, E. G. Straus, and F. A. Valentine, <i>Number of farthest points</i>	221
Tyre A. Newton, <i>A note on the Hölder mean</i>	807
T. K. Pan, <i>The spherical curvature of a hypersurface in Euclidean space</i>	461
George Piranian. See Imanuel Marx and George Piranian.....	447
H. Pollak. See P. Davis and H. Pollak.....	47
Ruth Lind Potter, <i>On self-adjoint differential equations of second order</i>	467
G. Power, <i>Forces on the boundary of a dielectric</i>	233
R. M. Redheffer, <i>On a theorem of Plancherel and Pólya</i>	823
M. Rosenblatt. See J. L. Hodges, Jr., and M. Rosenblatt.....	127
E. H. Rothe, <i>A note on the Banach spaces of Calkin and Morrey</i>	493
Leo Sario, <i>Alternating method on arbitrary Riemann surfaces</i>	631
Eugene Schenkman, <i>A generalization of the central elements of a group</i>	501
A. Seidenberg, <i>A note on the dimension theory of rings</i>	505
R. G. Selfridge, <i>Approximations with least maximum error</i>	247
Harold N. Shapiro, <i>Iterates of arithmetic functions</i>	647
H. Shniad, <i>Convexity properties of integral means of analytic functions</i>	657
Marlow Sholander, <i>Plane geometries from convex plates</i>	667
E. G. Straus. See T. S. Motzkin, E. G. Straus, and F. A. Valentine.....	221
E. G. Straus. See P. Erdős and E. G. Straus.....	689
G. Szegő, <i>Remark on the preceeding paper of Charles Loewner</i>	437
Choy-tak Taam, <i>On the complex zeros of functions of Sturm-Liouville type</i>	837
F. A. Valentine. See T. S. Motzkin, E. G. Straus, and F. A. Valentine.....	221

AMERICAN MATHEMATICAL SOCIETY

NATIONAL BUREAU OF STANDARDS,

INSTITUTE FOR NUMERICAL ANALYSIS

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced), and the author should keep a complete copy. Manuscripts may be sent to any of the editors except Robinson, whose term expires with the completion of the present volume; they might also be sent to M. M. Schiffer, Stanford University, Stanford, California, who is succeeding Robinson. All other communications to the editors should be addressed to the managing editor, E. F. Beckenbach, at the address given above.

Authors are entitled to receive 100 free reprints of their published papers and may obtain additional copies at cost.

The *Pacific Journal of Mathematics* is published quarterly, in March, June, September, and December. The price per volume (4 numbers) is \$8.00; single issues, \$2.50. Special price to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$4.00 per volume; single issues, \$1.25.

Subscriptions, orders for back numbers, and changes of address should be sent to the publishers, University of California Press, Berkeley 4, California.

Printed at Ann Arbor, Michigan. Entered as second class matter at the Post Office, Berkeley, California.
