CONTENTS

EDITORIAL MESSAGES	i
CONFERENCE ANNOUNCEMENTS	ii
CONFERENCE REPORTS	iii
TOPICAL SURVEYS	
Steven G. Krantz Convexity in Real Analysis	1
RESEARCH ARTICLES	
Saibal Ranjan Ghosh and Hiranmay Dasgupta	
Classification of Points of Lower Semi-continuity of a	
Multifunction in Topological Spaces	29
M. Namdari and S. Afrooz	
$C_\infty(X)$ and Related ideals	45
Ch. Rini Indrati	
Two-Norm Convergence in the L_p Spaces	55
Grzegorz Matusik	
On the Lattice Generated by Hamel Functions	65
Péter Maga	
Full Dimensional Sets Without Given Patterns	79
Martin Koc	
Upper Porosity With Respect to Measures	91
E. M. Bonotto, M. Federson, and P. Muldowney	
A Feynman-Kac Solution to a Random Impulsive Equation	
of Schrödinger Type	107
Olena Karlova	
Extension of continuous functions to Baire-one functions . . .	149
INROADS	
Behrouz Emamizadeh	
The Distribution Function and Measure Preserving Maps . . .	161
Robert Kantrowitz	
Submultiplicativity of Norms for Spaces of Generalized	
BV-functions	169
Martin Mačaj and Martin Sleziak	
$\mathcal{I}^\mathcal{K}$ -convergence	177

Gearald Beer and Jesús Rodríguez-López	
Ultimately Increasing Functions	195
Antonios Bisbas and Jörg Neunhäuserer	
On Inhomogeneous Bernoulli Convolutions and Random	
Power Series	213
Rafał Filipów, Andrzej Nowik, and Piotr Szuca	
There are Measurable Hamel Functions	223
T. Natkaniec	
An Example of a Quasi-continuous Hamel Function	231
Robert E. Zink	
On the Haar Measures in Topological Fields	237
ERRATA	
Aparna Vyas and Rajeshwari Dubey	
Wavelet Sets Accumulating at the Origin	243
