

CONTENTS

M. JINZENJI and H. SAITO , Moduli space of quasimaps from \mathbb{P}^1 with two marked points to $\mathbb{P}(1, 1, 1, 3)$ and j -invariant	995
T. AOKI, T. TAKAHASHI and M. TANDA , The hypergeometric function, the confluent hypergeometric function and WKB solutions	1019
Y. OGAWA , Auslander's defects over extriangulated categories: An application for the general heart construction	1063
M. SOBAJIMA and Y. WAKASUGI , Supersolutions for parabolic equations with unbounded or degenerate diffusion coefficients and their applications to some classes of parabolic and hyperbolic equations	1091
H. BACHMANN, Y. TAKEYAMA and K. TASAKA , Finite and symmetric Mordell–Tornheim multiple zeta values	1129
T. MELCHER , Stochastic integrals and Brownian motion on abstract nilpotent Lie groups	1159
Y. FUJISHIMA and K. ISHIGE , Initial traces and solvability of Cauchy problem to a semilinear parabolic system	1187
T. NAKANISHI , Teichmüller space and the mapping class group of the twice punctured torus	1221
T. KATSURA and N. SAITO , On the multicanonical systems of quasi-elliptic surfaces	1253
Y. CHEN , On singularities of threefold weighted blowups	1263
S. KOBAYASHI , An upper bound for higher order eigenvalues of symmetric graphs	1277
B. BODE and S. KAMADA , Knotted surfaces as vanishing sets of polynomials	1289
