

CONTENTS

P. BANGERE, J. A. CHEN and F. J. GALLEGRO , On higher dimensional extremal varieties of general type	761
J. KIM , Systolic inequalities, Ginzburg dg algebras and Milnor fibers	785
T. MIKAMI , Covering monotonicity of the limit shapes of first passage percolation on crystal lattices	801
O. FUJINO , On quasi-log schemes	829
Y. TAKAHASHI , Operad structures in geometric quantization of the moduli space of spatial polygons	857
M. TANAKA, T. AKAMATSU, R. SINCLAIR and M. YAMAGUCHI , Generalized von Mangoldt surfaces of revolution and asymmetric two-spheres of revolution with simple cut locus structure	881
S.-J. MATSUBARA-HEO , Localization formulas of cohomology intersection numbers	909
M. MINE , Large deviations for values of L -functions attached to cusp forms in the level aspect	941
T. SUZUKI and T. TSUCHIYA , Liouville's formulae and Hadamard variation with respect to general domain perturbations	983
J. T. CHO, M. KIMURA and M. ORTEGA , A twistor construction of Hopf real hypersurfaces in complex hyperbolic space	1025
H. TAHARA , Asymptotic existence theorem for formal solutions with singularities of nonlinear partial differential equations via multisummability	1055
