

CONTENTS

J. NOGUCHI , Analytic Ax–Schanuel for semi-abelian varieties and Nevanlinna theory	1
Z. ZHENG and Y. ZHONG , The complex ball-quotient structure of the moduli space of certain sextic curves	23
T. NISHINO , Obstructions to deforming maps from curves to surfaces	51
T. HONDA, H. ODA and N. SHIMENO , Inversion formula for the hypergeometric Fourier transform associated with a root system of type BC	73
T. GAŁAŻKA and A. OSEKOWSKI , Sharp $L^p \rightarrow L^{q,\infty}$ estimates for the Hilbert transform	111
H. ISHIDA , Strong cohomological rigidity of Hirzebruch surface bundles in Bott towers	125
H. TAMVAKIS , Tableau formulas for skew Grothendieck polynomials	147
K. GUNJI , On the Fourier coefficients of Siegel Eisenstein series of degree 3 of an odd prime level with the quadratic character	173
T. MORIFUJI , Simple Hurwitz groups and eta invariant	217
J. ROQUES , Frobenius method for Mahler equations	229
T. FUKAYA , A topological product decomposition of Busemann space	269
S. ESAKI and H. TANEMURA , Stochastic differential equations for infinite particle systems of jump type with long range interactions	283
