

CONTENTS

C. ZONG , Characterization of the two-dimensional fivefold and sixfold lattice tiles . . .	997
M. NAKASUJI, Y. OHNO and W. TAKEDA , An interpolation of the generalized duality formula for the Schur multiple zeta values to complex functions	1033
Y.-S. WANG , JSJ decomposition for handlebody-knots	1049
T. SUZUKI and T. TSUCHIYA , Hadamard variation of eigenvalues with respect to general domain perturbations	1087
N. YAMAGUCHI and Y. YAMAGUCHI , Generalized Dedekind's theorem and its application to integer group determinants	1123
Y. BRUNED and U. NADEEM , Diagram-free approach for convergence of trees based model in regularity structures	1139
M. BENKHALIFA , On the group of self-homotopy equivalences of an F_0 -space	1171
N. MATRINGE , Symmetric periods for automorphic forms on unipotent groups	1187
M. MORIMOTO , Construction of one-fixed-point actions on spheres of nonsolvable groups II	1209
K. INABA , A generalized join theorem for real analytic singularities	1257
R. KOSHIO and Y. KOZAKAI , Normal subgroups and support τ -tilting modules	1279
Y. HAMANA and H. MATSUMOTO , Brownian hitting to spheres	1307
