Table of contents

§ 1. Introduction	242
PART I. THEORY ON THE LIE ALGEBRA	
§ 2. Reduction of Theorem 1 to the semisimple case	243
§ 3. Second reduction	249
§ 4. Third reduction	250
§ 5. New expressions for J and J'	252
§ 6. Proof of Lemma 7	255
§ 7. A consequence of Theorem 1	258
§ 8. Some elementary facts about tempered distributions	259
§ 9. Proof of Lemma 17	263
§ 10. An auxiliary result	265
§ 11. Proof of Lemma 21	267
§ 12. Recapitulation of some elementary facts	268
§ 13. Proof of Lemma 26	269
§ 14. Tempered and invariant eigendistributions	271
§ 15. Proof of Lemma 30	275
§ 16. The distribution T_λ	277
§ 17. Application of Theorem 1 to T_λ	281
§ 18. Proof of Lemma 41	283
PART II. THEORY ON THE GROUP	
§ 19. Statement of Theorem 3	288
§ 20. Proof of the uniqueness	289
