

MEAN MOTIONS AND ZEROS OF ALMOST PERIODIC FUNCTIONS.

By

BØRGE JESSEN and HANS TORNEHAVE
in COPENHAGEN.

Contents.

	Page
Introduction	138
Lagrange's problem on mean motion	138
Almost periodic functions of a real variable	143
Mean motions of almost periodic functions of a real variable	147
Analytic almost periodic functions	148
Distribution problems for almost periodic functions	152
Mean motions and zeros of analytic almost periodic functions	159
Chapter I. <i>Mean motions of almost periodic functions of a real variable</i>	167
Chapter II. <i>The Jensen function of an analytic almost periodic function</i>	176
Preliminary description of the variation of the argument and the distribution of the zeros	176
The mean motions and frequencies of zeros	179
The Jensen function	182
The connection between the Jensen function and the mean motions and frequencies of zeros	185
Strips without zeros. Periodic functions	188
Functions whose exponents are bounded above or below	191
Chapter III. <i>On the distribution of the values of real almost periodic sequences</i>	193
Almost periodic sequences	193
Asymptotic distribution functions	196
Asymptotic distribution functions of real almost periodic sequences	198
Detailed discussion of the distribution for a given abscissa	204
Chapter IV. <i>Analytic almost periodic functions connected with almost periodic sequences</i>	221
