

# NEVANLINNA THEORY AND HOLOMORPHIC MAPPINGS BETWEEN ALGEBRAIC VARIETIES

BY

PHILLIP GRIFFITHS and JAMES KING<sup>(1)</sup>

*Harvard University, Cambridge, Mass. 02138, USA and M.I.T., Cambridge, Mass. 02139, USA*

## Table of Contents

INTRODUCTION . . . . .	146
0. NOTATIONS AND TERMINOLOGY . . . . .	151
(a) Divisors and line bundles . . . . .	151
(b) The canonical bundle and volume forms . . . . .	154
(c) Differential forms and currents (terminology) . . . . .	155
1. DIFFERENTIAL FORMS, CURRENTS, AND ANALYTIC CYCLES . . . . .	157
(a) The Poincaré equation and its globalization . . . . .	157
(b) The Poincaré equation for vector-valued functions . . . . .	160
(c) Globalization of the Martinelli equation . . . . .	162
(d) Lelong numbers . . . . .	164
2. SPECIAL EXHAUSTION FUNCTIONS ON ALGEBRAIC VARIETIES . . . . .	165
(a) Definition and some examples . . . . .	165
(b) Construction of a special exhaustion function . . . . .	167
(c) Some properties of the projection (2.5) . . . . .	168
3. SOME INTEGRAL FORMULAS AND APPLICATIONS . . . . .	171
(a) Jensen's theorem . . . . .	171
(b) The Nevanlinna characteristic function . . . . .	174
(c) Jensen's theorem for vector-valued functions . . . . .	175
4. CONDITIONS THAT A DIVISOR BE ALGEBRAIC . . . . .	177
5. THE ORDER FUNCTION FOR HOLOMORPHIC MAPPINGS . . . . .	181
(a) Definition and basic properties . . . . .	181
