Orsay, France*

## Contents

1. Introduction . . . . .	240
2. Definitions and background . . . . .	244
2.1. Temperleyan polyominoes . . . . .	244
2.2. Conformal properties . . . . .	245
2.3. Average height function . . . . .	248
2.4. Dirichlet energy . . . . .	250
3. Cutting a lattice region into rectangles . . . . .	252
4. The probability of the next domino on a cut . . . . .	256
4.1. The slit plane . . . . .	256
4.2. Proof of Lemma 6 . . . . .	257
5. The change in the Dirichlet energy . . . . .	261
5.1. Dependence on 4-jet . . . . .	262
5.2. Computation for a specific family of functions . . . . .	264
5.3. Beginning and ending of a cut . . . . .	268
5.4. Ending on the interior of an edge . . . . .	271
5.5. Ending at a concave corner . . . . .	271
6. The case of rectangles . . . . .	271
6.1. Dirichlet energy for a rectangle . . . . .	272
7. Loop-erased random walk . . . . .	275
7.1. LERW and dominos . . . . .	275
7.2. Region with a white hole . . . . .	276
7.3. Unicity of the limit . . . . .	278
7.4. On RHP . . . . .	280
7.5. The number of tilings of $Q$ . . . . .	280
8. Open problems . . . . .	283
9. Appendix . . . . .	283
9.1. Green's function for a slit plane . . . . .	283
9.2. Local Riemann mappings . . . . .	284
References . . . . .	285
