

LINEAR HYPERBOLIC PARTIAL DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS.

BY

LARS GÅRDING

of LUND.

Contents.

| | Page |
|---|------|
| Introduction | 2 |
| Chapter 1. Proof of theorem I | 9 |
| Chapter 2. Hyperbolic polynomials | 14 |
| Reduced polynomials | 14 |
| Hyperbolic polynomials | 16 |
| Three lemmas | 26 |
| The dual cone | 28 |
| Chapter 3. The Riesz kernel | 29 |
| A lemma | 29 |
| Construction of the kernel | 31 |
| Two examples | 34 |
| The Riesz kernel and the elementary solution | 35 |
| Chapter 4. The Riesz operator | 37 |
| Definition of the Riesz operator. Two theorems | 37 |
| Proof of theorem 4.1 | 39 |
| Proof of theorem 4.2 | 45 |
| A lemma | 47 |
| Proof of theorem II | 48 |
| Chapter 5. The problem of Cauchy. Generalizations | 49 |
| The problem of Cauchy | 49 |
| The surface S | 50 |
| The Riesz operator | 53 |
| Chapter 6. The domain of dependence | 54 |
| Introduction | 54 |
| Structure of the domains of dependence of I and J | 56 |
| Lacunas | 60 |
| Bibliography | 61 |
