BECK, HANS, Elementargeometrie. — XII + 112 p. 8. 1929.

Abbildungen. Affinitäten. Abbildungsgruppen. Die Gruppen der Elementargeometrie. Analytische Affingeometrie. Statik. Metrik.

Blackie and Son Ltd.

London and Glasgow.

Mc CONNELL, A. J., Applications of the Absolute Differential Calculus. — XII + 318 p. 8. 1931. 20 s.

P. I. Algebraic preliminaries: Notation and definitions. Tensor analysis.
P. II. Algebraic geometry: Rectilinear coordinates. The plane. The straight line. The quadric cone and the conic. Systems of cones and conics. Central quadrics. The general quadric. Affine transformations. P. III. Differential geometry: Curvilinear coordinates. Covariant differentiation. Curves in space. Intrinsic geometry of a surface. The fundamental formulae of a surface. Curves on a surface. P. IV. Applied mathematics: Dynamics of a particle. Dynamics of rigid bodies. Electricity and magnetism. Mechanics of continuous media. The special theory of relativity. Orthogonal curvilinear coordinates in mathematical physics.

The University of Chicago Press.

Chicago.

LEVINSON, HORACE C. and ZEISLER, ERNEST BLOOMFIELD. The law of gravitation in relativity. — 127 p. 8. 1931. \$ 3,50.

Introduction. Elements of the tensor theory. Algebra of tensors. Differential properties. The tensors $R_{\mu\nu\rho}$ and $G_{\mu\nu}$. Fundamental tensors. The laws of gravitation. Applications to the solar field.

1 — 31356. *Acta mathematica*. 58. Imprimé le 23 novembre 1931.
