## Contents

1. Introduction . . . . .	84
2. Bordered surfaces with marked points and ideal triangulations . .	87
3. Arc complexes . . . . .	91
4. Signed adjacency matrices and their mutations . . . . .	95
5. Cluster algebras associated with triangulated surfaces . . . . .	101
6. Types and diagrams . . . . .	103
7. Tagged arc complexes . . . . .	107
8. Denominators and intersection numbers . . . . .	113
9. Proofs of main results . . . . .	115
9.1. Basic properties of tagged arc complexes . . . . .	116
9.2. Strata of tagged triangulations . . . . .	117
9.3. Mutations and flips in the tagged case . . . . .	118
9.4. Cycles in the graph of flips . . . . .	119
9.5. Tropical exchange relations for intersection numbers . . . . .	123
9.6. Proofs of Theorems 5.6, 7.11 and 8.6 . . . . .	126
10. On the topology of cluster complexes . . . . .	128
11. Polynomial vs. exponential growth . . . . .	131
12. Finite mutation classes . . . . .	132
13. Block decompositions . . . . .	136
14. Recovering topology from combinatorial data . . . . .	139
Acknowledgments . . . . .	143
References . . . . .	144
