

NOTE

ACKNOWLEDGMENT OF PRIORITY TO
"NOTE ON ANDERSON'S SEQUENTIAL PROCEDURES
WITH TRIANGULAR BOUNDARY"

BY VÁCLAV FABIAN
Michigan State University

Of the two theorems in the above note (*Ann. Statist.* 2 170–176) the first was proved and the second stated by William D. Lawing and H. T. David in "Likelihood ratio computations of operating characteristics," in *Ann. Math. Statist.* 37 (1966), 1704–1716 (a wrong title appeared on the cover). Professor H. T. David kindly brought this fact to my attention.
