**EMPIRICAL PROCESSES ASSOCIATED WITH V-STATISTICS AND
A CLASS OF ESTIMATORS UNDER RANDOM CENSORING**

BY MICHAEL G. AKRITAS

The Annals of Statistics (1986) 14 619–637

The last sentence in Remark 2.1 incorrectly implies that the applicability of the estimators by Wei and Gail (1983) is limited. The intention was to state that their estimators do not share the efficiency properties of the uncensored data Hodges–Lehmann estimators even under equal censoring distributions.
