

CORRECTION

**SECOND ORDER APPROXIMATION TO THE RISK OF A
SEQUENTIAL PROCEDURE**

BY ADAM T. MARTINSEK

The Annals of Statistics (1983) **11** 827–836

In the statement of Theorem 1 on page 828, and throughout the paper, the assumption that “the distribution of the \bar{X}_i is nonlattice” should be replaced by “the distribution of $3/2 - (X_1 - \mu)^2/2\sigma^2$ is nonlattice,” or equivalently “the distribution of $3 - (X_1 - \mu)^2/\sigma^2$ is nonlattice.”
