

MOMENTS AND DISTRIBUTIONS OF ESTIMATES OF POPULATION PARAMETERS FROM FRAGMENTARY SAMPLES *

S. S. WILKS**

CONTENTS:

- I. Introduction.
- II. Simultaneous estimation by the method of maximum likelihood.
 1. Joint efficiency of a set of estimates.
 2. Simultaneous estimation of a and b .
 3. Simultaneous estimation of σ_x and σ_y .
 4. Simultaneous estimation of σ_x , σ_y and r .
- III. Systems of independent estimates.
 1. Distribution of \bar{x}_o and \bar{y}_o .
 2. Characteristic function of ξ_o , η_o and ξ_o .
 3. Characteristic function and sampling distribution of $\bar{\xi}_o$, $\bar{\eta}_o$ and $\bar{\xi}_o$.
 4. Moments of $\bar{\xi}_o$, $\bar{\eta}_o$ and $\bar{\xi}_o$ when $r=0$.
 5. Variances and covariances of $\sqrt{\bar{\xi}_o}$, $\sqrt{\bar{\eta}_o}$ and r_o in large samples.
 6. Efficiency of the system θ , ϕ and $\frac{5}{\sqrt{\xi}\eta}$.
- IV. Summary.

*Presented to the American Mathematical Society, March 25, 1932.

**National Research Fellow in Mathematics.
