

# Index

Volume 55

---

- Agarwal, Mahesh, and Jim Brown*, Saito–Kurokawa lifts of square-free level, 641
- Andrejić, Vladica, and Zoran Rakić*, On some aspects of duality principle, 567
- Bahlekeh, Abdolnaser, and Shokrollah Salarian*, Virtual Gorensteinness over group algebras, 129
- Baklouti, Ali, Sonia Ghaouar, and Fatma Khlif*, Deforming discontinuous subgroups of reduced Heisenberg groups, 219
- Brown, Jim*, See Agarwal and Brown, 641
- Brown, M. L.*, Structure of Tate–Shafarevich groups of elliptic curves over global function fields, 687
- Cassou-Noguès, Pierrette, and Daniel Daigle*, Very good and very bad field generators, 187
- Corrales García, María Guadalupe, Dolores Martín Barquero, and Cándido Martín González*, On the gauge action of a Leavitt path algebra, 243
- Cuong, Nguyen Tu, Shiro Goto, and Nguyen Van Hoang*, On the cofiniteness of generalized local cohomology modules, 169
- Daigle, Daniel*, See Cassou-Noguès and Daigle, 187
- Ene, Viviana, Jürgen Herzog, and Takayuki Hibi*, Linear flags and Koszul filtrations, 517
- Fetcu, Dorel, and Ana Lucia Pinheiro*, Biharmonic surfaces with parallel mean curvature in complex space forms, 837
- Freitag, Eberhard, and Riccardo Salvati Manni*, Vector-valued Hermitian and quaternionic modular forms, 819
- Freudenburg, Gene*, An affine version of a theorem of Nagata, 663
- Fujita, Takahiko*, Special values of the Riemann zeta function via arcsine random variables, 673
- Ghaouar, Sonia*, See Baklouti, Ghaouar, and Khlif, 219
- González-Sánchez, Jon, Albert Ruiz, and Antonio Viruel*, On Thompson’s  $p$ -complement theorems for saturated fusion systems, 617
- Goto, Shiro, Liam O’Carroll, and Francesc Planas-Vilanova*, Noncomplete intersection prime ideals in dimension 3, 461
- Goto, Shiro*, See Cuong, Goto, and Van Hoang, 169
- Herzog, Jürgen*, See Ene, Herzog, and Hibi, 517
- Hibi, Takayuki*, See Ene, Herzog, and Hibi, 517
- Higashitani, Akihiro*, Smooth Fano polytopes arising from finite directed graphs, 579
- Huang, Xiangdi*, On formation of singularity of spherically symmetric nonbarotropic flows, 1
- Ikoma, Hideaki*, A Bertini-type theorem for free arithmetic linear series, 531
