CONTENTS

1.	Introduction . . . . .	459
1.1.	Motivation . . . . .	460
1.2.	Main results . . . . .	461
1.3.	Summary of contents . . . . .	463
1.4.	Acknowledgments . . . . .	463
2.	Pure motives over a base . . . . .	463
2.1.	Cohomology theories . . . . .	464
2.2.	Grothendieck motives: A reminder . . . . .	465
2.3.	Pure motives over a base . . . . .	468
2.4.	Realisation . . . . .	474
3.	Technical issues . . . . .	476
3.1.	Compatibility of $f^!$ . . . . .	476
3.2.	Products and composition . . . . .	482
3.3.	$\mathcal{D}_{cc}^b$ is pseudoabelian . . . . .	486
4.	Standard conjectures and canonical filtrations . . . . .	487
4.1.	Standard conjectures . . . . .	488
4.2.	Murre's conjecture . . . . .	490
4.3.	Saito's filtration . . . . .	492
5.	Grothendieck motives over a base, semisimplicity, and decomposition . . . . .	494
5.1.	Perverse sheaves and the topological decomposition theorem . . . . .	494
5.2.	Grothendieck motives over $S$ . . . . .	497
5.3.	Semisimplicity and decomposition in $\mathcal{M}(S)$ . . . . .	498
6.	Filtrations for quasi-projective varieties . . . . .	505
6.1.	Proof of Theorem 6.1 . . . . .	507
6.2.	Proof of Theorem 6.3 . . . . .	511
6.3.	Applications . . . . .	513
7.	Decomposition in $CH\mathcal{M}(S)$ . . . . .	514

**1. Introduction.** We explain our original motivation for writing this paper, then summarise the main results and outline the contents of each section.

Received 30 June 1998. Revision received 19 October 1999.
