

COMPLEX DIFFERENTIAL AND INTEGRAL
GEOMETRY AND CURVATURE INTEGRALS
ASSOCIATED TO SINGULARITIES OF COMPLEX
ANALYTIC VARIETIES

PHILLIP A. GRIFFITHS

Table of Contents

Introduction

1. <i>Hermann Weyl's formula for the volume of tubes and the Gauss-Bonnet theorem</i>	
a) Frames and derivation of the formula	432
b) Tubes and the Gauss-Bonnet theorem	437
c) Gauss mapping and the Gauss-Bonnet theorem	440
Footnotes	443
2. <i>Integral geometry for manifolds in \mathbb{R}^N</i>	
a) Crofton's formula in the plane	444
b) Application of Crofton's formula to total curvature	447
c) The kinematic formula	451
Footnotes	454
3. <i>Hermitian differential geometry and volumes of tubes in the complex case</i>	
a) Frames and Chern forms for complex manifolds in \mathbb{C}^N	454
b) Remarks on integration over analytic varieties	463
c) Volume of tubes in the complex case	467
Footnotes	472
4. <i>Hermitian integral geometry</i>	
a) The elementary version of Crofton's formula	472
b) Crofton's formula for Schubert cycles	476
c) The second Crofton formula	479
d) The third Crofton formula	485
<i>Appendix to Sections 2 and 4: Some general observations on integral geometry</i>	492
Footnotes	496
5. <i>Curvature and Plücker defects</i>	
a) Gauss-Bonnet and the Plücker paradox	496
b) The Plücker defect and Langevin's formula	500
c) Extension to higher codimension and isolation of the top Milnor number	505
d) Further generalizations and open questions	506
Footnotes	512

Received May 26, 1978. These are the Gergen Memorial Lectures delivered March 26-30, 1978 at Duke University. Research partially supported by N.S.F. Grant MCS 77-07782
