

LOG COMPLEXES OF CURRENTS AND
FUNCTORIAL PROPERTIES OF THE
ABEL–JACOBI MAP

JAMES R. KING

CONTENTS

Introduction	
0.0. Notation	6
Section One: Log complexes	
1.1. Complexes of forms	7
1.2. Relative log forms	10
1.3. The log complex of currents	13
1.4. Relative log currents	18
Section Two: Functorial properties of the Abel–Jacobi map	
2.1. Cohomology of log complexes	21
2.2. Integer cohomology	23
2.3. Intermediate Jacobians and the Abel–Jacobi map	24
2.4. Functorial properties of the Abel–Jacobi map: push–forward G_*	26
2.5. Functorial properties of the Abel–Jacobi map: intersection with submanifolds	27
2.6. Functorial properties of the Abel–Jacobi map: intersection with subvarieties	29
2.7. Functorial properties of the Abel–Jacobi map: correspondences	33
2.8. Functorial properties of the Abel–Jacobi map: correspondences over maps	34
Section Three: Jacobian sheaves	
3.1. Jacobian sheaves and normal functions	36
3.2. Hodge sheaves and pairings	38
3.3. Gauss–Manin connection	41
Section Four: Intersection currents	
4.1. Currents of intersection type	42
4.2. Cohomology of intersection currents: codimension greater than one	45
4.3. Cohomology of intersection currents: codimension one	46
4.4. Other log complexes of currents	51
