NONLINEAR, ANALYTIC PARTIAL DIFFERENTIAL EQUATIONS WITH GENERALIZED GOURSAT DATA

DAVID COLTON AND ROBERT P. GILBERT

This paper appeared in volume 37(1970), pp. 367–376. The initial value problem solved in Section 2 is for Equations (4), (9) and (10) rather than for (4), (6) and (7). The initial value problem for (4), (6) and (7) is treated in Section 6. Equation (43) holds only for ρ sufficiently small. We are grateful to Professor James Conlan for pointing out the above corrections to us.

A cut point theorem for plane continua

CHARLES L. HAGOPIAN

This paper appeared in volume 38(1971), pp. 509–512. Lines 26 and 27 on page 509 (the third condition in Definition 1) should read “(3) the sets $C_1 U_{i+1}$ and (a_i -component of $M - V_i$) are disjoint”.
