

VOLUME INDEX

- Abbas, Saïd, *Asymptotic behavior of fractional order Riemann-Liouville Volterra-Stieltjes integral equations*, 311.
- Allaei, Sonia Seyed, *Existence, uniqueness and regularity of solutions to a class of third-kind Volterra integral equations*, 325.
- Benchohra, Mouffak, see Abbas, Saïd.
- Bors, Dorota, *Stability of nonlinear Urysohn integral equations via global diffeomorphisms and implicit function theorems*, 343.
- Brunner, Hermann, *The oscillation of solutions of Volterra integral and integro-differential equations with highly oscillatory kernels*, 455.
- Brunner, Hermann, see Allaei, Sonia Seyed.
- Burton, T.A., *A necessary condition for a non-negative solution of an integral equation*, 367.
- Cakoni, Fioralba, *Boundary integral equations for the transmission eigenvalue problem for Maxwell's equations*, 375.
- Cao, Yanzhao, *A stochastic collocation method for stochastic Volterra equations of the second kind*, 1.
- Chang, Yong-Kui, *Some new results on bounded solutions to a semilinear integro-differential equation in Banach spaces*, 153.
- Chappell, David J., *Boundary integral solution of potential problems arising in the modelling of electrified oil films*, 407.
- Das, Sanjukta, *Existence of solution of impulsive second order neutral integro-differential equations with state delay*, 489.
- Ferreira, Chelo, *Convergent and asymptotic expansions of solutions of differential equations with a large parameter: Olver cases II and III*, 27.
- Haddar, Housseem, see Cakoni, Fioralba.
- Idczak, Dariusz, *Application of a global implicit function theorem to a general fractional integro-differential system of Volterra type*, 521.
- Ismailov, Mansur I., *Canonicability of the first order system of hyperbolic equations*, 47.
- Kress, Rainer, *A nonlinear integral equation and an iterative algorithm for an inverse source problem*, 179.
- Kulkarni, Rekha P., *Asymptotic error analysis of projection and modified projection methods for nonlinear integral equations*, 67.
- Latrach, Khalid, *An existence result for a class of nonlinear functional integral equations*, 199.
- Levadoux, David, *A well-conditioned boundary integral equation for transmission problems of electromagnetism*, 431.
- Lizama, Carlos, *Abstract Volterra equations with state-dependent delay*, 219.
- López, José L., see Ferreira, Chelo.
- Ma, Yunyun, see Brunner, Hermann.
- Meng, Shixu, see Cakoni, Fioralba.
- Millot, Florence, see Levadoux, David.
- Mydlarczyk, W., *A multiple nonlinear Abel type integral equation*, 555.
- N'Guérékata, G.M., see Chang, Yong-Kui.
- Nidhin, T.J., see Kulkarni, Rekha P.
- Pandey, D.N., see Das, Sanjukta.
- Pandolfi, L., *Sharp control time for viscoelastic bodies*, 103.
