

**ORTHOGONAL POLYNOMIALS
AND
SINGULAR STURM-LIOUVILLE SYSTEMS, I**

LANCE L. LITTLEJOHN AND ALLAN M. KRALL

CONTENTS

Abstract

- I.1 Introduction.
- I.2 Orthogonal polynomials.
 - II.1 The classic orthogonal polynomials.
 - II.2.a. The Jacobi polynomials.
 - II.2.b. The Legendre polynomials.
 - II.2.c. The Tchebycheff polynomials of the first kind.
 - II.2.d. The Tchebycheff polynomials of the second kind.
 - II.3.a. The generalized Laguerre polynomials.
 - II.3.b. The ordinary Laguerre polynomials.
 - II.4 The Hermite polynomials.
 - II.5.a. The generalized Bessel polynomials.
 - II.5.b. The ordinary Bessel polynomials.
 - II.5.c. Bessel polynomials and the Laplace transform.
- III.1 Second order boundary value problems.
- III.2 The differential operator, adjoint operator.
- III.3 Regular boundary value problems.
- III.4 Singular boundary conditions.
 - III.5.a. Singular boundary value problems.
 - III.5.b. Extensions I.
 - III.5.c. Extensions II.
 - III.5.d. Other boundary constraints.
- III.6 Examples.
 - III.7.a. The Jacobi boundary value problem.
 - III.7.b. The Legendre boundary value problem.
 - III.7.c. The Tchebycheff problem of the first kind.
 - III.7.d. The Tchebycheff problem of the second kind.
 - III.8.a. The generalized Laguerre boundary value problem.
 - III.8.b. The ordinary Laguerre boundary value problem.
