

FIXED POINTS OF PLANE CONTINUA

CHARLES L. HAGOPIAN

Dedicated to Professor Sandra Barkdull

CONTENTS

	Page
ABSTRACT	120
1. INTRODUCTION	120
2. MORE BACKGROUND	121
3. THE DECOMPOSITION \mathcal{D}	123
4. RAYS	124
5. INDECOMPOSABILITY IN THE LIMIT	127
6. FOLDED RAYS	128
7. FRAMES	144
8. FRAMING OVER A SEQUENCE OF RAYS	149
9. FRAMING OVER ONE RAY	151
10. BORSUK RAYS	152
11. NESTED LIMITS	154
12. AN UNCOUNTABLE SUBCOLLECTION OF \mathcal{D}	155
13. TRIODS AND BRIDGES	167
14. OUR PRINCIPAL THEOREM	168
15. APPLICATIONS TO ARC-COMPONENT-PRESERVING MAPS	174
16. THE POINCARÉ-BENDIXSON THEOREM	175
APPENDIX: A SUMMARY OF THE PROOF OF OUR PRINCIPAL THEOREM	181
ACKNOWLEDGMENTS	183
REFERENCES	184

Received by the editors on July 1, 1990, and in revised form on March 17, 1991 and March 23, 1992.

1980 AMS (MOS) *Subject Classifications*. Primary 54F20, 54H25, Secondary 54H20, 57N05, 58F25.

Key words and phrases. Fixed point, plane continuum, decomposition, uniquely arcwise connected set, arc-component-preserving map, indecomposable continuum, planar dynamical system, flow, Poincaré-Bendixson theorem, Borsuk ray, dog-chases-rabbit principle.

Supported by NSF Grant DMS-8703483.
