

Banach J. Math Anal.
Volume 7, Number 1, 2013

- 1 Noncommutative integration** pp. 1-13
M. Takesaki
- 2 A comprehensive survey on an order preserving operator inequality** pp. 14-40
T. Furuta
- 3 On left and right decomposably regular operators** pp. 41-58
Q. Zeng; H. Zhong; S. Zhang
- 4 Weighted composition operators between vector-valued Lipschitz function spaces** pp. 59-72
K. Esmaeili; H. Mahyar
- 5 Geometry of the left action of the p-Schatten groups** pp. 73-87
M.E. Di Iorio Lucero
- 6 The sequence space $E_n^q(M, p, s)$ and N_k -lacunary statistical convergence** pp. 88-96
N.L. Braha; M. Et
- 7 McIntosh formula for the gap between regular operators** pp. 97-106
G. Ramesh
- 8 Weyl's theorem for algebraically quasi- A operators** pp. 107-115
F. Zuo; H.L. Zuo
- 9 The best lower bound for Jensen's inequality with three fixed ordered variables** pp. 116-131
V. Cirtoaje
- 10 A combinatorial approach to Musielak-Orlicz spaces** pp. 132-141
J. Prochno
- 11 Sharp maximal function inequalities and boundedness for Toeplitz type operator related to general fractional integral operators** pp. 142-159
L. Liu
- 12 Hilbert-Schmidt differences of composition operators between the weighted Bergman spaces on the unit ball** pp. 160-172
L. Zhang; Z.-H. Zhou
- 13 A Fubini theorem on function spaces and its applications** pp. 173-185
H.S. Chung; J.G. Choi; S.J. Chang
- 14 Asymptotic intertwining by the identity operator and permanence of spectral properties** pp. 186-195
B.P. Duggal
- 15 On linear functional equations and completeness of normed spaces** pp. 196-200
A. Fošner; R. Ger; A. Gilányi; M.S. Moslehian
