

**Banach J. Math. Anal.**  
**Volume 8, Number 2, 2014**

- |   |             |
|---|-------------|
| <b>1 Compact operators in the commutant of essentially normal operators</b><br>H. Mustafayev; F. Huseynov                                   | pp. 1-15    |
| <b>2 Maximal ideal space of some Banach algebras and related problems</b><br>S. Saltan; Y. Ozel   | pp. 16-29   |
| <b>3 Compactness criteria in Banach spaces in the setting of continuous frames</b><br>M.L. Măntoiu; D.A. Parra                              | pp. 30-48   |
| <b>4 <math>L^p</math>-maximal regularity of degenerate delay equations with periodic conditions</b><br>S. Bu                                | pp. 49-59   |
| <b>5 Pseudoquotients on commutative Banach algebras</b><br>D. Atanasiu; P. Mikusinski; A. Siple   | pp. 60-66   |
| <b>6 The controlled separable complementation property and monolithic compacta</b><br>J. Ferrer   | pp. 67-78   |
| <b>7 Norm-additive in modulus maps between function algebras</b><br>M. Hosseini; J.J. Font  | pp. 79-92   |
| <b>8 Disjointness preserving linear operators between Banach algebras of vector-valued functions</b><br>T. Honary; A. Nikou; A.H. Sanatpour | pp. 93-106  |
| <b>9 Generalized biprojectivity and biflatness of abstract Segal algebras</b><br>F. Abtahi  | pp. 107-117 |
| <b>10 A characterization of convex functions and its application to operator monotone functions</b>   | pp. 118-123 |
