

REVIEWS

The Association for Symbolic Logic publishes analytical reviews of selected books and articles in the field of symbolic logic. The reviews were published in *The Journal of Symbolic Logic* from the founding of the JOURNAL in 1936 until the end of 1999. The Association moved the reviews to this BULLETIN, beginning in 2000.

The Reviews Section is edited by Alasdair Urquhart (Managing Editor), Steve Awodey, John Baldwin, Lev Beklemishev, Anuj Dawar, Mirna Džamonja, David Evans, Erich Grädel, Denis Hirschfeldt, Hannes Leitgeb, Roger Maddux, Grigori Mints, and Volker Peckhaus. Authors and publishers are requested to send, for review, copies of books to *ASL, Box 742, Vassar College, 124 Raymond Avenue, Poughkeepsie, NY 12604, USA*.

In a review, a reference “JSL XLIII 148,” for example, refers either to the publication reviewed on page 148 of volume 43 of the JOURNAL, or to the review itself (which contains full bibliographical information for the reviewed publication). Analogously, a reference “BSL VII 376” refers to the review beginning on page 376 in volume 7 of this BULLETIN, or to the publication there reviewed. “JSL LV 347” refers to one of the reviews or one of the publications reviewed or listed on page 347 of volume 55 of the JOURNAL, with reliance on the context to show which one is meant. The reference “JSL LIII 318(3)” is to the third item on page 318 of volume 53 of the JOURNAL, that is, to van Heijenoort’s *Frege and vagueness*, and “JSL LX 684(8)” refers to the eighth item on page 684 of volume 60 of the JOURNAL, that is, to Tarski’s *Truth and proof*.

References such as 495 or 280I are to entries so numbered in *A bibliography of symbolic logic* (the JOURNAL, vol. 1, pp. 121–218).

Absolute generality, edited by Agustín Rayo and Gabriel Uzquiano, Clarendon Press, Oxford, 2006, ix + 396 pp.—therein:

AGUSTÍN RAYO AND GABRIEL UZQUIANO. *Introduction*. Pp. 1–19.

KIT FINE. *Relatively unrestricted quantification*. Pp. 20–44.

MICHAEL GLANZBERG. *Context and unrestricted quantification*. Pp. 45–74.

GEOFFREY HELLMAN. *Against ‘absolutely everything’*. Pp. 75–97.

SHAUGHAN LAVINE. *Something about everything: Universal quantification in the universal sense of universal quantification*. Pp. 98–148.

ØYSTEIN LINNEBO. *Sets, properties, and unrestricted quantification*. Pp. 149–178.

VANN MCGEE. *There’s a rule for everything*. Pp. 179–202.

CHARLES PARSONS. *The problem of absolute generality*. Pp. 203–219.

AGUSTÍN RAYO. *Beyond plurals*. Pp. 220–254.

STEWART SHAPIRO AND CRISPIN WRIGHT. *All things indefinitely extensible*. Pp. 255–304.

GABRIEL UZQUIANO. *Unrestricted unrestricted quantification: The cardinal problem of absolute generality*. Pp. 305–332.

ALAN WEIR. *Is it too much to ask, to ask for everything?* Pp. 333–368.

TIMOTHY WILLIAMSON. *Absolute identity and absolute generality*. Pp. 369–389.

This is a collection of new papers on a currently hot topic by an impressive array of authors. Enthusiasts will already have devoured the book. But what does it offer the rest of us?
