CONFERENCE ANNOUNCEMENT

Western Illinois University will host a five day conference, entitled:

A Symposium in Real Analysis:

Bounded Variation and Absolute Continuity

in Fourier Series and Surface Area Theory

during the period July 17-21, 1978. The principal lecturer will be Professor Casper Goffman of Purdue University. The administration of Western Illinois University has agreed to support this conference by providing for the use of Tanner Conference Center on campus at subsidized rates for all participants and by providing room and board funding for a limited number of participants. Western Illinois University is submitting a proposal to the National Science Foundation in an effort to gain recognition for this event as an N.S.F.-C.B.M.S. Regional Conference and thus obtain funds which would permit a larger number of funded participants as well as funds for travel.

We encourage those wishing to attend this symposium to contact us as soon as convenient so that we can make the appropriate reservations. With your letter please indicate whether you are applying for room and board support. Barring unforeseen difficulties, we will notify those receiving room and board monies by March 15, 1978. The basic symposium rates are listed below.

Room	(Two twin beds, closets, and dressers, and one writing desk, not fancy but reasonable accommodations)	
	Single/day	$6.50
	Double/day	$4.50
Meals	(Buffet style, choices available at every meal)	
	3 meals/day	$7.00
