

# REAL ANALYSIS EXCHANGE

## CONTENTS

CONFERENCE ANNOUNCEMENTS .....	4
PROCEEDINGS OF THE TENTH SYMPOSIUM .....	6
LETTER TO THE EDITOR .....	143
<b>TOPICAL SURVEY</b>	
Solomon Leader	
A concept of differential based on variational equivalence under generalized Riemann integration .....	144
<b>RESEARCH ARTICLES</b>	
J. Malý	
Perfect level sets in many directions .....	176
I. Mustafa	
A general approach to typical results .....	180
R. Shortt	
The singularity of extremal measures .....	205
A. Alikhani-koopaei	
Borel measurability of extreme path derivatives .....	216
T. Natkaniec	
The lattice generated by differentiable functions .....	247
H. Miller	
On a result of S. Kurepa .....	252
S. Meinershagen	
$D^\#$ differentiation basis and the Lebesgue-Stieltjes integral .....	265
F. Cater	
Lengths of rectifiable curves in 2-space .....	282
B. Thomson	
Some remarks on differential equivalence .....	294
L. Zajíček	
Porosity, $I$ -density topology and abstract density topologies .....	313
E. Love	
Lebesgue points of fractional integrals .....	327
M. Evans and P. Humke	
$L$ -points of typical functions in the Zahorski classes .....	337
J. Tkadlec	
Construction of a finite Borel measure with $\sigma$ -porous sets as null sets .....	349
<b>INROADS</b>	
D. Preiss and V. Šverák	
Derivatives of type 1 .....	354
L. Daia	
On a theorem of Shizuo Kakutani .....	361
J. Ash	
Generalized differentiation and summability .....	366
R. Gibson and F. Roush	
The restrictions of connectivity functions are nice but not that nice .....	372
J. Morgan	
On the general theory of point sets, II .....	377
T. Natkaniec	
Some remarks on category projections of planar sets .....	387
QUERIES .....	393
