# REAL ANALYSIS

# EXCHANGE

## CONTENTS

<b>EDITORIAL MESSAGE</b> . . . . .	380
<b>CONFERENCE ANNOUNCEMENT</b> . . . . .	381
<b>TOPICAL SURVEYS</b>	
C. Goffman	
Lusin's Theorem . . . . .	382
W. Filter and I. Labuda	
Essays on the Orlicz-Pettis theorem, I (The two theorems) . . . . .	393
<b>RESEARCH ARTICLES</b>	
S. Meinershagen	
Upper and lower bounds for the packing measure in relation to the Hausdorff measure . . . . .	404
Z. Piotrowski and E. Wingler	
A note on continuity points of functions . . . . .	408
J. Jastrzebski, J. Jedrzejewski and T. Natkaniec	
Points of almost continuity of real functions . . . . .	415
B. Kaczmarek	
On the set of points at which a function has infinite one-sided derivative . . . . .	421
R. Mabry	
Sets which are well-distributed and invariant relative to all isometry invariant total extensions of Lebesgue measure . . . . .	425
R. Henstock	
Stochastic and other functional integrals . . . . .	460
F. Cater	
A Bernstein partition of a space of measurable sets . . . . .	471
Z. Grande	
Derivatives and the Carathéodory superposition . . . . .	475
B. Kirchheim and T. Natkaniec	
On universally bad Darboux functions . . . . .	481

(Continued on back cover)
