	Page
Satoshi NAITO: Twining characters and Kostant's homology formula	157
Boo-Yong CHOI and Jin-Wan YIM: Distributions on Riemannian manifolds, which are harmonic maps	175
Mitsuo KATO and Masatoshi NOUMI: Monodromy groups of hypergeometric functions satisfying algebraic equations	189
Kunio SAKAMOTO: Variational problems of normal curvature tensor and concir- cular scalar fields	207
Tomoyuki SHIRAI: Long time behavior of the transition probability of a random walk with drift on an abelian covering graph	255
Takehito SHIINA: Rigid braid orbits related to $\mathrm{PSL}_2(p^2)$ and some simple groups	271
Georges DLOUSSKY, Karl OELJEKLAUS and Matei TOMA: Class VII_0 surfaces with b_2 curves	283
Norihito KOISO: Vortex filament equation in a Riemannian manifold	311
