Volume 15 Number 3 Fall 2003
(ISSN 0899-6180)

Contents

EDITORIAL

150 Editorial, *by Terry Goodman.*

ARTICLES

153 Universal Forms: The Four-Square Theorem and its Generalizations, *by Mark B. Beintema and Azar N. Khosravani.*

162 Illustrating the Prime Number Theorem via Mathematica, *by Werner Horn.*

173 Fun with the $\sigma(\mathbf{n})$ Function, *by Andrew Feist.*

178 Area of a Triangle in Terms of the Taxicab Distance, *by Münevver Özcan and Rüstem Kaya.*

186 A Characterization of Paracompactness in Terms of Filterbases, *by Bhamini M. P. Nayar.*

189 An Investigation of the Set of Ans Numbers, *by Norman E. Elliott and Dan Richner.*

200 Problems 141–144.

202 Solutions 137–140.
