Contents

EDITORIAL

138 Editorial, *by Terry Goodman.*

ARTICLES

140 Returns to the Origin for Random Walks on \mathbb{Z} Revisited, *by Helmut Prodinger.*

143 Representing Integers in the Binary Number System as Permanents of Certain Matrices, *by Seol Han-Guk.*

148 Evaluation of a Class of Multiple Integrals, *by Mohamed Akkouchi.*

153 An Informal Approach to Formal Inner Products, *by Richard Hammack.*

161 On Positive Derivatives and Monotonicity, *by Stephen D. Casey and Richard Holzsager.*

174 New Algorithms for the Division's Quotient, *by S. Mazouzi.*

OTHER INFORMATION

194 Problems 157–160.

196 Solutions 149–152.
