

**CORRECTION TO “A REGULARITY THEORY
FOR HARMONIC MAPS”**

RICHARD SCHOEN AND KAREN UHLENBECK

In the statement of Lemma 2.5 of this paper (J. Differential Geometry 17 (1982) 307–335), the word “harmonic” should be deleted. That the map u_0 is harmonic can only be established after some regularity is known; in particular, the fact that u_0 is harmonic follows from Proposition 4.7. The fact that u_0 is harmonic is not used in any intermediate arguments.
