

# ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 14, Numbers 5-6

May/June 2009

---

## CONTENTS

<b>M. García-Huidobro, R. Manásevich, and J. R. Ward,</b> Positive solutions for equations and systems with $p$ -Laplace like operators .....	401
<b>Takashi Suzuki and Ryo Takahashi,</b> Degenerate parabolic equation with critical exponent derived from the kinetic theory, I, generation of the weak solution .....	433
<b>Alexander J. Zaslavski,</b> Existence and structure of solutions for an infinite horizon optimal control problem arising in economic dynamics	477
<b>George Dinca and Florin Isaia,</b> Generalized Pohozaev identity and a non-existence result for the $p$ -Laplacian: weak solutions .....	497
<b>Laura Ferracuti and Francesca Papalini,</b> Boundary-value problems for strongly nonlinear multivalued equations involving different $\Phi$ -Laplacians .....	541
<b>Nathan Glatt-Holtz and Mohammed Ziane,</b> Strong pathwise solutions of the stochastic Navier-Stokes system .....	567
