

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 19, Numbers 5-6

May/June 2014

R. Dhanya, S. Prashanth, K. Sreenadh, and Sweta Tiwari, Critical growth elliptic problem in \mathbb{R}^2 with singular discontinuous nonlinearities .	409
S.N. Antontsev and H.B. de Oliveira, Analysis of the existence for the steady Navier-Stokes equations with anisotropic diffusion	441
G. Metafuno, C. Spina, and C. Tacelli, Elliptic operators with unbounded diffusion and drift coefficients in L^p spaces	473
Abbas Moameni, Non-convex self-dual Lagrangians and new variational principles of symmetric boundary value problems: Evolution case	527
Chaohua Jia, Ivonne Rivas, and Bing-Yu Zhang, Lower regularity solutions of a class of non-homogeneous boundary value problems of the Korteweg-de Vries equation on a finite domain	559
Giuseppe Maria Coclite and Mario Michele Coclite, On the summability of weak solutions for a singular Dirichlet problem in bounded domains	585
