

# ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 19, Numbers 9-10

September/October 2014

---

<b>James Colliander, Magdalena Czubak, and Jeonghun J. Lee,</b> Interaction Morawetz estimate for the magnetic Schrödinger equation and applications .....	805
<b>Marcelo Montenegro and Antonio Suárez,</b> A symbiotic self-cross diffusion model .....	833
<b>Youngwoo Koh, Sanghyuk Lee, and Ryo Takada,</b> Dispersive estimates for the Navier-Stokes equations in the rotational framework .....	857
<b>Sanjiban Santra,</b> Uniqueness of positive solutions with critical exponent and inverse square potential .....	879
<b>Hans-Otto Walther,</b> Complicated histories close to a homoclinic loop generated by variable delay .....	911
<b>Claudio Muñoz,</b> Stability of integrable and nonintegrable structures .....	947
